**NOTIFICATION OF DRAFT MEASURES – RETAIL HIGH QUALITY DATA
TRANSMISSION SERVICE MARKET, WHOLESALE HIGH-QUALITY DATA
TRANSMISSION SERVICES VIA TRUNK SEGMENTS MARKET, WHOLESALE HIGH-
QUALITY DATA TRANSMISSION SERVICES VIA TERMINATING SEGMENTS
MARKET**

Dear Madam or Sir,

The Communications Regulatory Authority of the Republic of Lithuania (RRT), in line with its tasks and obligations set in the Law on Electronic Communications of the Republic of Lithuania, transposing the European Union regulatory framework of 2002, has conducted the analysis of the following markets:

- Retail high-quality data transmission service market which was previously analysed and notified in 2006 as a market of minimum set of leased lines, included in the annex to the Commission Recommendation of 11 February 2003 (2003/11/EC) as Market 7. Due to the changes in the market structure and the appearance of the new products on the market, in the currently notified market analysis RRT defined this market as “Retail high-quality data transmission service market” (further referred to as “Retail high-quality market”) which includes all services of Minimum set of leased lines market. Retail high-quality market is not listed in the annex to the Commission Recommendation 2014/710/EC of 9 December 2014.
- Wholesale high-quality data transmission services via trunk segments market which was previously analysed and notified in 2006 as Wholesale trunk segments of leased lines market, included in the annex to the Commission Recommendation of 11 February 2003 (2003/11/EC) as Market 14. Due to the changes in this market and the appearance of the new product, in the currently notified market analysis RRT defined this market as “Wholesale high-quality data transmission services via trunk segments market” (further referred to as “Trunk segment market”). This market is not listed in the annex to the Commission Recommendation 2014/710/EC of 9 December 2014.
- Wholesale high-quality access provided at a fixed location. Previously this market was analysed and notified in 2006, subject to the Commission Recommendation of 11 February 2003 (2003/11/EC). In the annex to this recommendation, the notified market was defined as

“Wholesale terminating segments of leased lines” (Market 13). In Commission Recommendation 2014/710/EC of 9 December 2014, this market was defined as “Wholesale high-quality access provided at a fixed location (Market 4). Due to changes in market definitions in relevant Commission recommendations, RRT defined Wholesale high-quality access provided at a fixed location market as **“Wholesale high-quality data transmission services via terminating segment market”** (further referred to as **“Terminating segment market”**).

As Retail high-quality market and Trunk segment market were found *not* to be susceptible to *ex ante* regulation, RRT proposes to withdraw the obligations imposed on TEO LT, AB, an undertaking designated as having significant market power in 2006. Terminating segment market was found to be susceptible to *ex ante* regulation, therefore RRT suggests continuing the regulation of this market and amending the obligations imposed on TEO LT, AB, an undertaking designated as having significant market power in 2006.

This notification is submitted in line with Article 16, Paragraph 12 of the Law on Electronic Communication of the Republic of Lithuania transposing Article 7, Paragraph 3 of the Directive 2002/21/EC of the European Parliament and of the Council on a common regulatory framework for electronic communications networks and services.

This notification contains the following documents (non-confidential):

1. Summary notification form.
2. Draft Report on market analysis.
3. Draft order on the market definition.
4. Draft order on announcing orders null and void.
5. Draft order on TEO LT, AB designation as having significant market power.

Yours sincerely,

Director General

Feliksas Dobrovolskis
